## Award ceremony Conversation

### Part1

**Host (Rebecca Welton):** We'd like now to invite Ted Lasso to come up and present awards to some of our top contributors. Please **welcome** Ted to the stage.

[applause]

**Client (Ted Lasso):** Thank you....First of all, thank you so much for having me here over the last few days and making me feel so welcome during my visit. **It's wonderful to finally have the chance to** meet you all in person and get to know you all better.

**Before** I present the awards, **I just want to** say a few words on behalf of everyone at Ariadne Industries.

Don't worry, **I'll keep it brief.**

First, let me say it's truly an honor to be standing among such talented individuals. As a drug development company, **we pride ourselves on** producing life-saving medications that really make a difference, but **we couldn't do that without** the expertise and skill of all of you here today.

**I want to express my sincere gratitude to** each and every one of you for your exceptional skill, professionalism and dedication. **Through** your expertise, innovation and hard work, **we were able to overcome** every challenge that came our way.

You have all **played an integral role in** the success of the project and I'd like to acknowledge everyone's contribution. With such a strong team, it really has been a challenge to single out individuals for awards. **That being said**, we deliberated carefully together with your leaders here and came up with a shortlist of names, which we've narrowed down to today's winners. It's a great privilege to present these awards to our deserving recipients. So, without further ado, **let me hand over to Rebecca to** announce the winners.

**Host:** Thank you, Ted, for your generous words. **I can't wait to** announce who the winners are. The first award is the "Excellence in Innovation Award," which recognizes outstanding creativity and innovative thinking in the field of pharmaceutical research...

And I'm pleased to announce that this award goes to Dr. Li Wei. Dr. Li Wei's innovative approach to problem-solving has **been instrumental in** overcoming the numerous challenges we encountered during the course of this project. Since I first met Dr. Li as a fresh graduate, he has always been **committed to** continuously expanding his knowledge and keeping up with all the developments in the industry. In particular, he has become an expert in the field of photo-redox chemistry, where he is always looking for novel practical applications of cutting-edge techniques. Dr. Li is our go-to person for advice whenever we encounter complex reactivity or selectivity issues in our photochemistry, and **is always willing to** lend a hand and offer solutions.

The innovative techniques he's developed for this project have helped us devise more efficient, cheaper, and greener pathways, and the techniques developed will be useful in our future collaboration.

Everyone, let's give a round of applause to Dr. Li.

**Would you like to say a few words, Dr. Li?**

**Dr. Li:** Absolutely...**though I wasn't expecting this so I don't have anything prepared.** But first, I'd **like to thank** Ariadne Industries **for** providing exiting opportunities, for your trust in us, and for all your support and valuable suggestions. I've really enjoyed and **benefited from** our constructive discussions around the chemistry challenges we've encountered. I think I speak for all of us when I say we've all learned a lot from working with your team on this project.

Also, **I'd like to add that, while** it's an honor to receive this award, this project has been a team effort. I'm lucky to have such a great team of hardworking and resourceful chemists working alongside me. Each member of the team has contributed their expertise and put in tremendous effort to make this project a success. Thank you everyone!
